

Series 5000 – Students

1. Elementary and Secondary

D. Welfare

(1) School Medical Advisor

(b) Illness

(vii) Students with HIV, ARC (AIDS Related Complex) or AIDS

Scientific studies show that the Human Immunodeficiency Virus (HIV), the virus which causes the Acquired Immune Deficiency Syndrome (AIDS) or ARC (AIDS Related Complex), is transmitted through sexual intercourse with an infected individual or through exposure to contaminated blood or needles. There is no evidence to support the notion that the HIV virus can be transmitted through ordinary school or household activities, e.g. coughing, sneezing, hugging, sharing of utensils or food, or shaking hands.

The anonymity of individuals with HIV infection or AIDS is protected by law. Moreover, individuals with HIV infection or AIDS are protected from discrimination by both federal and state laws. Neither attendance at school nor employment may be denied to an individual with HIV infection or AIDS. It is the policy of the District that no student or staff member with HIV infection or AIDS may be prohibited from attending school or employment unless there is an immediate risk of injury or harm to the individual or to others.

The District may be unaware of the diagnosis of HIV infection or AIDS because it is a confidential matter between the individual student or staff member and his or her physician. Consequently, the Board of Education has adopted a policy of “universal precautions” which protects all students and staff from contact with blood and body fluids of others. These precautions are enumerated in the Bloodborne Pathogen policy (#4147.1 and #4247.1)

(cf – 4147.1/4247.1 Bloodborne Pathogens)
