February 13, 2018

Dear McAlister Families:

A child at our school has contracted chickenpox and your child may have been exposed. Since this is an easily spread virus, we wanted to inform all our families. Additionally, those families with children who we know to be at high risk of contracting chickenpox have been contacted directly by our school nurse, Mrs. Crocker. Information about chickenpox, how it spreads, and the vaccination for it can be found at the [Connecticut Children's Medical Center Website](#) and at the [Connecticut Department of Public Health](#).

As always, if you have any questions, please contact us directly.

Sincerely,

Karen E. Carpenter-Snow
Principal

Heidi Crocker, RN
McAlister School Nurse
